**THIRD QUARTERLY ANNOUNCEMENT
FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2005**

CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

MANAGEMENT DISCUSSION AND ANALYSIS

The Group is devoted to the solution of mechanical and electrical transportation projects in the PRC, the whole solution of Expressway networks toll collection system and system integration and R&D of new product in IT Industry.

Financial and business review

The Group recorded a turnover of approximately HK\$5,954,000 for the nine months ended 30 September 2005, representing a decrease of approximately 78% as compared with the corresponding period in 2004. A net loss of approximately HK\$5,871,000 was recorded for the nine months ended 30 September 2005

as compared with a net loss of approximately HK\$571,000 for the nine months ended 30 September 2004. Turnover for the nine month ended 30 September, 2005 were mainly contributed by the Yanshan-Pingyuanjie Expressway toll collection system in Yunnan province, the Yuanjiang-Mohei Expressway network toll collection systems. Currently the Group is in the course of negotiating on various big projects .

This year, the number of companies participating in mechanical and electrical transportation projects and transportation technology solutions is increasing. As a result, the bid price for the projects became comparatively low recently, and the business benefit of the enterprises has gone down accordingly. Consequently, the profit of the Group has been affected. The development of other businesses and products needs a process of introduction into the market. The businesses and products of this kind can hardly bring profit in a short period of time.

The Group adopts an aggressive business development strategy with the objective of playing an important role in the transportation technology solution industry in PRC. The Group has been implementing cost reduction measures to reduce operational costs. The Directors will continue to be vigilant in controlling operating costs and maintaining operational efficiency with a view to maximizing the profitability of the Group.

Capital Structure and Material acquisition

During the nine months ended 30 September 2005, the Group did not have any charges on its assets, and there were no changes in the Company's authorized share capital.

The Group has no material acquisition or disposal of subsidiaries and affiliated companies during the nine months ended 30 September 2005. It has no plans for material investment on capital assets.

Prospects

The Group will continue to be principally engaged in the provision of transportation technology solution in the PRC. As it is expected that, in the PRC, substantial economic growth will be maintained in the coming years, the Directors foresee that there will be an increasing demand for the toll collection systems in the PRC. Thus, the Directors believe that the Group will be able to secure additional projects in the future.

The indirectly owned associated company of the Group-smart mover ITS Technology Co. Limited has launched the mobile phone based comprehensive traffic information Service system on 1 March 2005 in Beijing City. They will develop a new city traffic management solution based on the existing transportation technology solution and will represent a first move of this kind in the PRC. The Directors believe that it stands at an excellent position to explore the enormous market. The Group is dedicated to developing its business and is geared to bring satisfactory reward to the shareholders.
